- Nitrosell

Why OpSuite?

Consolidate Business Processes Across your Entire Business

OpSuite provides you a single, integrated platform for all of your retail and management processes. OpSuite is your one comprehensive solution for:

OpSuite allows you to automate key business functions across all departments and locations throughout your enterprise. Your corporate employees, store managers, regional managers, buyers, and business planners will have a single source for all of the information they need to make key business decisions, allowing you, and them to spend more time building business, and less time chasing data. Since OpSuite is connected to each location, regardless of its focus, you are assured that data of every kind will be available throughout your operation for immediate use or analysis.

Dashboard Reporting, Analysis and Alerts for Faster and Better Decision Making

Standard and customized dashboards are designed with state-of-the-art technology allowing you to quickly and easily slice, dice, and drill down into information so you can deal with only the information that is important to you. Each user will be able to setup specific dashboards which focus directly on their responsibilities, keeping them focused and on task.

Locations and Location Groups Provide Flexible, Powerful Hierarchy Capabilities

Retail organizations with more than a few stores, warehouses, and/or distribution locations have a need to group their locations in one or more ways to optimize item management, pricing maintenance, promotion design, and customer maintenance. OpSuite allows you to create one, two, three, or as many levels of location groupings as you need, and then assign users to those groups, restricting them to viewing / managing data within their assigned group. Location groupings are also very helpful for Franchise Operations, allowing the Franchisor to build Franchisee groupings of locations, as well as groupings for Regional Managers and/or geographic areas.

Centralized Price and Promotion Management Maximizes Sales Throughout the Organization

Maintain optimal product markups and markdowns, along with promotion design and implementation, by location, through analytical reporting and planning. Set pricing or promotions by item, department, category, supplier, location, and any other combination of criteria to optimize sales and keep your customers coming back.

Superior Value for an Affordable Price

Designed and built for growing and mid-sized retail businesses, OpSuite offers an affordable solution while providing tools and features that even the most expensive packages can not provide.

Ease of Mind

Rest easy knowing that your information and your ability to manage it is available anytime, anyplace*, and that it is safe from prying eyes, as well as from mechanical or natural disaster through included state-of-the-art encryption and security tools, constant failover mirroring, daily backup, and monthly archive. So, not only are you able to do business more efficiently and more effectively, but you also can relax a bit... and enjoy your success!

*Internet Access Required.

*List is only a small sample of feature set. Some listed features sold as add-on modules.
